Storyboard-1

Rita is a undergraduate student! she has three assignments coming up and is not able to organize her schedule well. using app, her life is in right track and she is less frustrated because she is able to set reminder for the assignment.

Storyboard-2

Lax,a college student that's also working and going to college is having hard time trying to balance his work, personal time, and sleep.

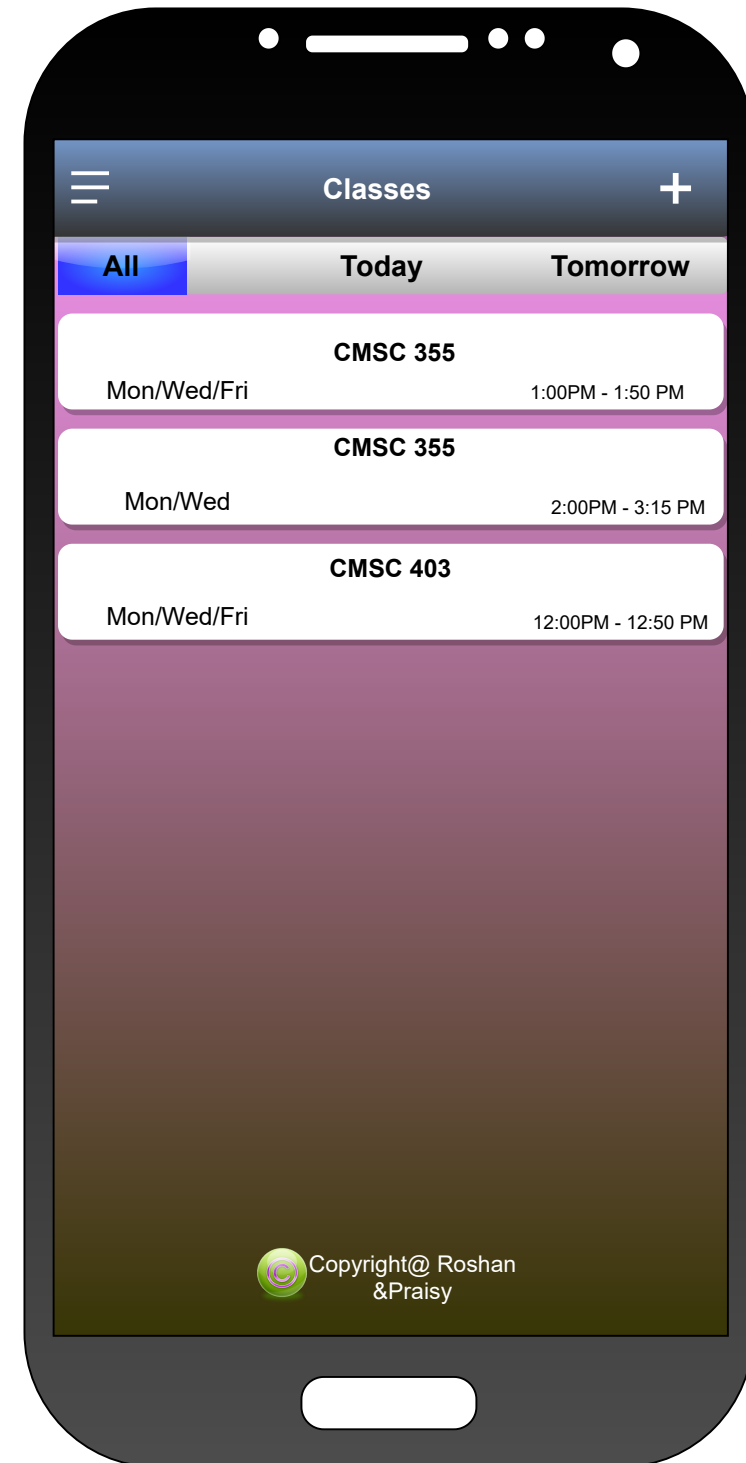

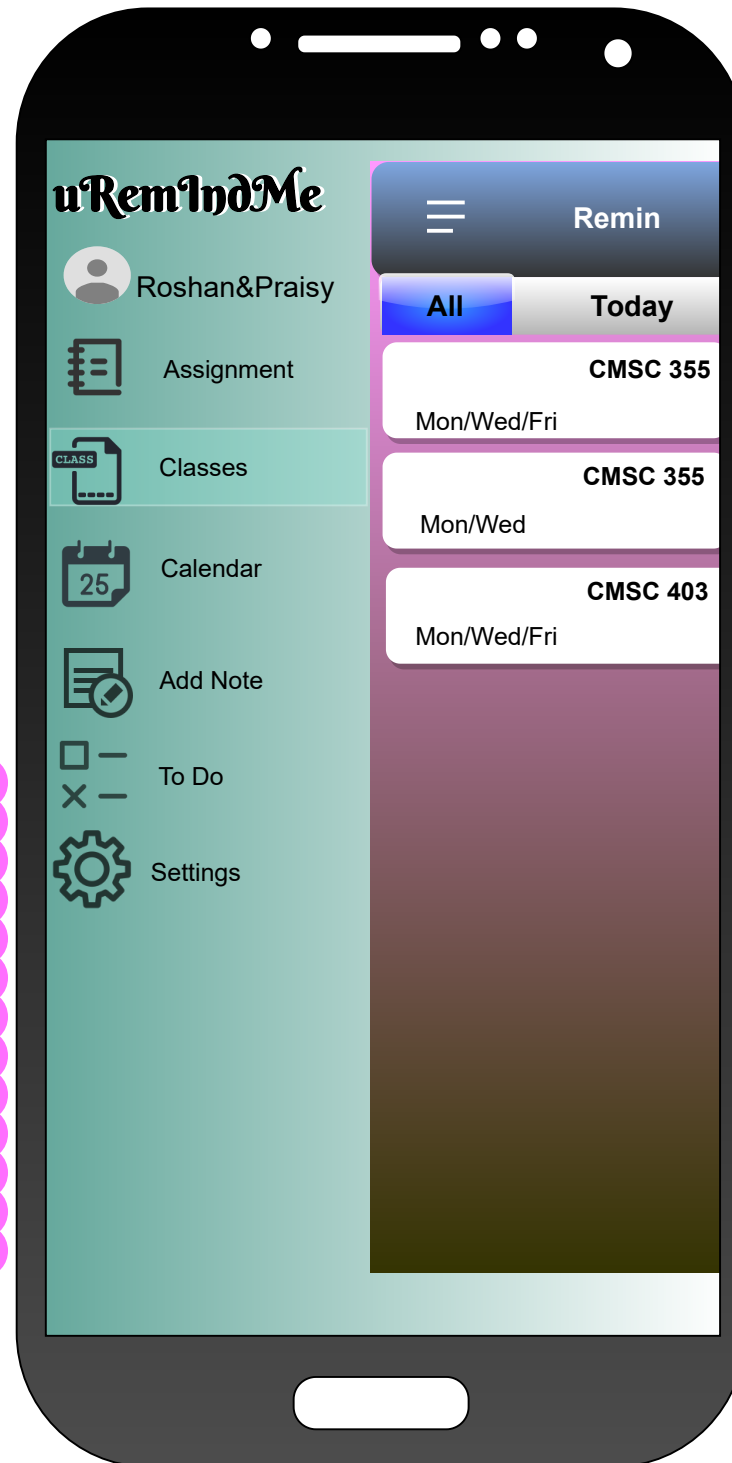

Storyboard-1

She is as lazy as a pig, and recently she missed her class due to confusion about her course number. She sets a reminder on her cell phone so that she doesn't miss it in the future. Now, She is happy because she gets a notification before every class starts.

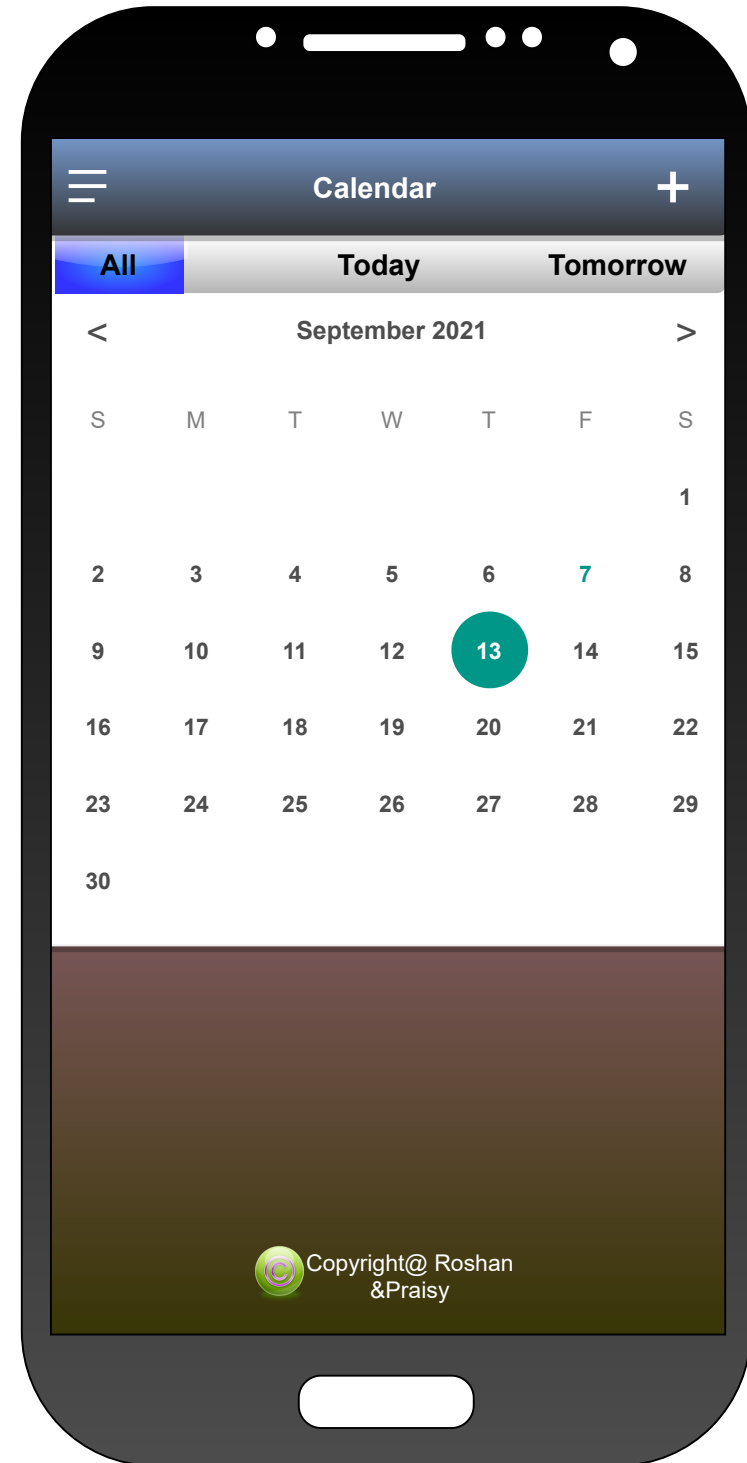

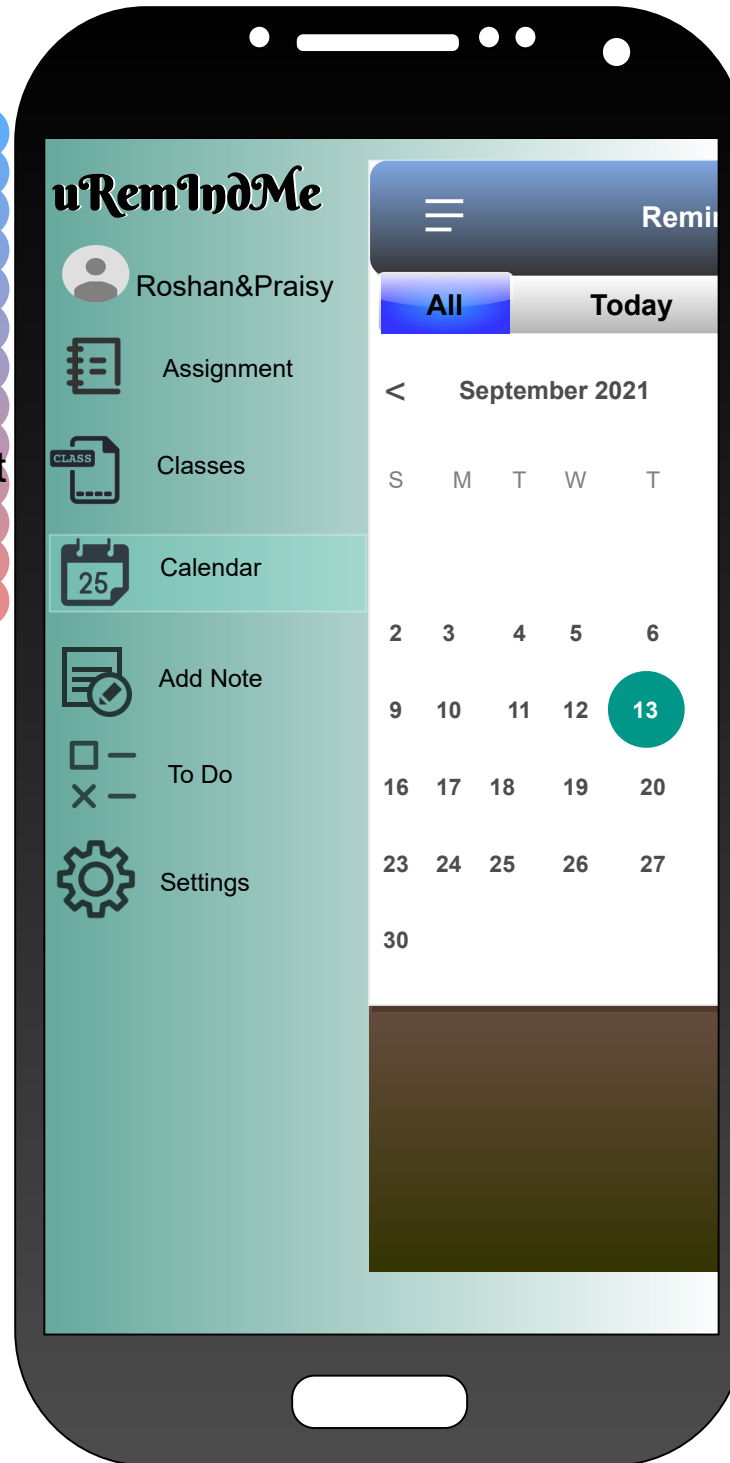

Storyboard-2

In order to lead a balanced life, he searches for an app. Luckily, he finds "uRemIndMe" schedule planner app.

Storyboard-1

However, these months were tough for Rita! She came to know that she was diagnosed with Alzheimer's. As a result, she couldn't track her regular schedule. She checks her calendar every hour to find out what's coming and to set a new reminder.

Storyboard-2

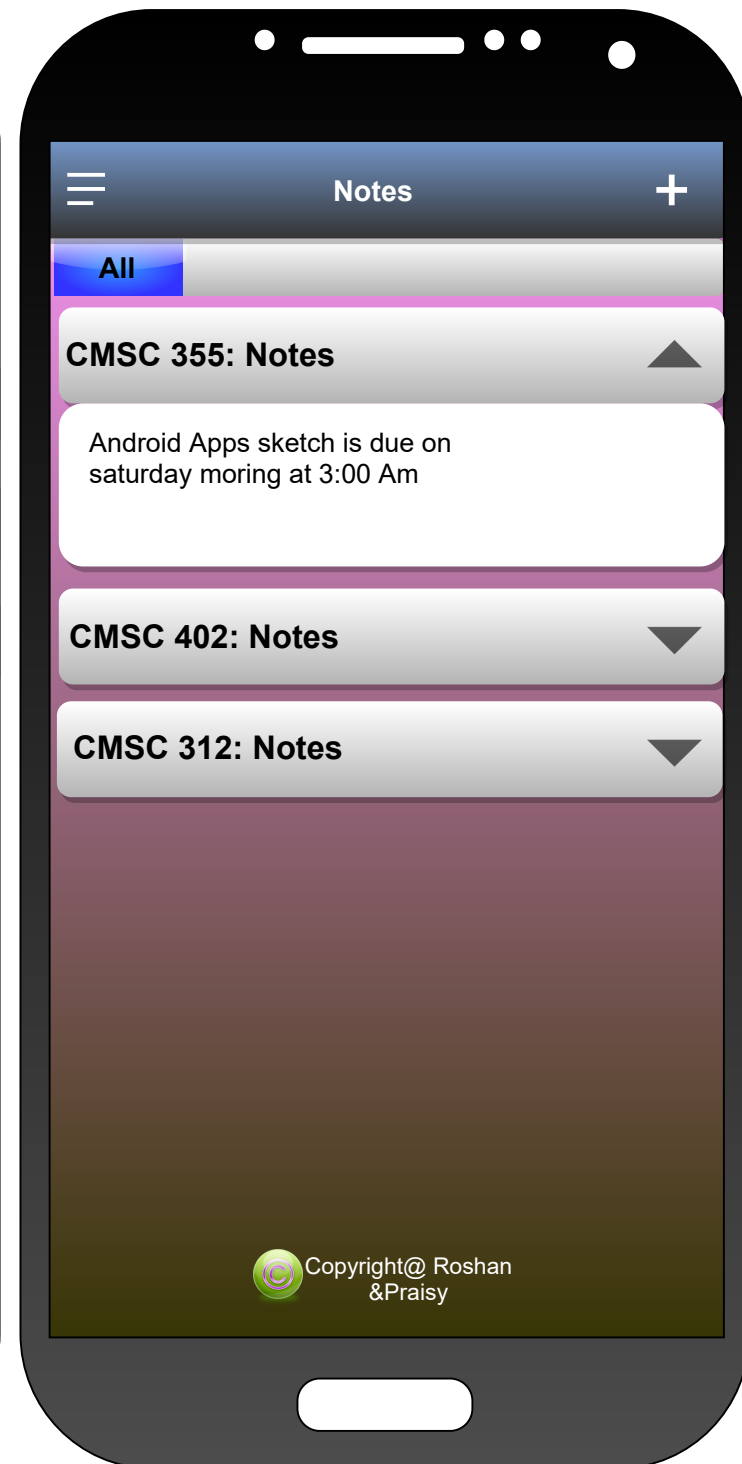

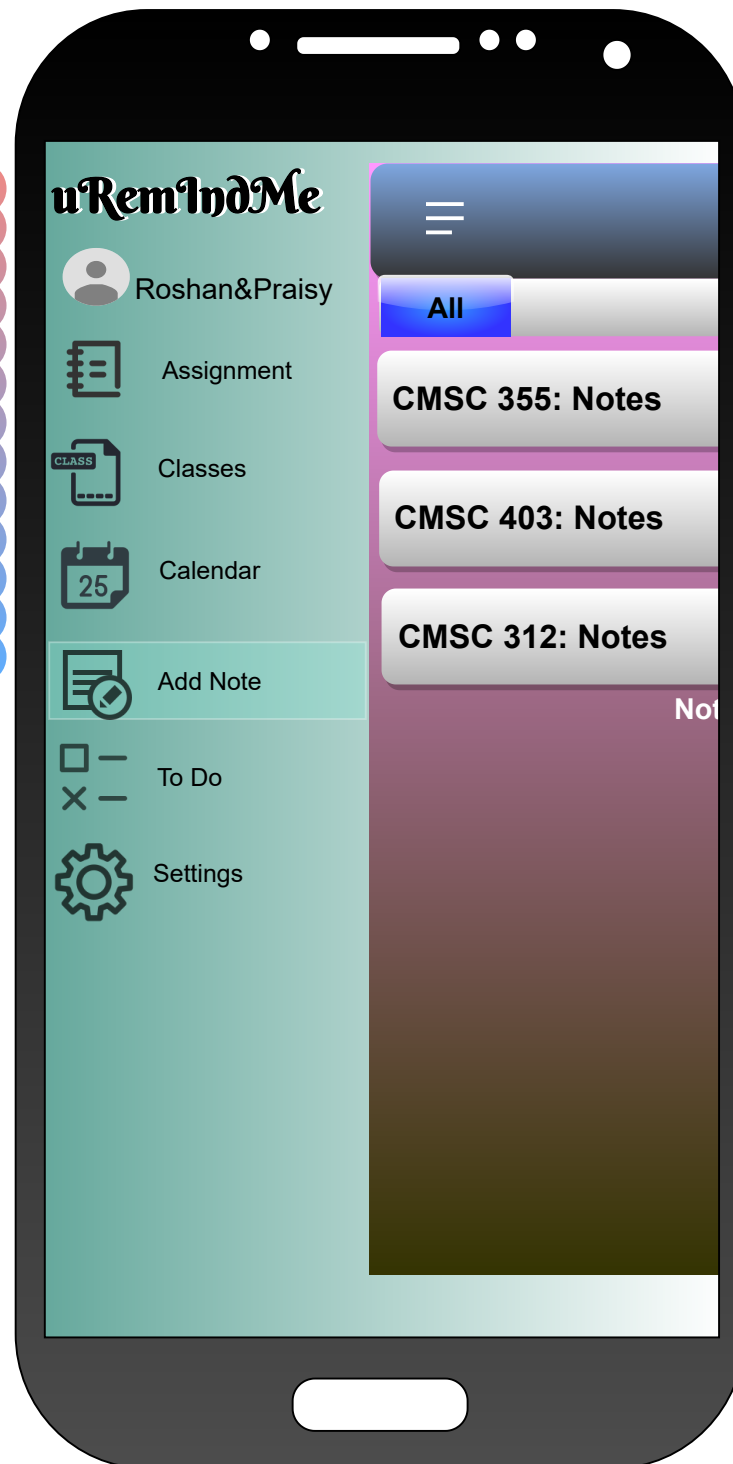

"uRemIndMe" schedule planner app is based of 888 rule - 8 hours of sleeping, 8 hours of studying and 8 hours of personal time.

Storyboard-1

Due to her sickness, she could not remember most of the class stuff. As a result, she uses Add Note function to add detailed summaries of her class that keeps her up to date.

Storyboard-2

The app creates a study schedule based on his working hours, making sure he has time to sleep, work, study and relax.

Storyboard-1

She also created a daily to-do list to keep herself informed about the daily task. These apps help her to overcome the fear of missing any due date for the classes. Finally, she lived happily ever.

Storyboard-2

Now he is able to lead a healthy lifestyle without missing any deadline.
